

SW900 Product Specifications

Fast heating, high volume delivery gives you the fastest hydro thermal kill available

The Steamwand SW900 is one of our most efficient machines.

It runs on 10L of water/minute and therefore has the ability to run 2 applicator heads simultaneously. Like the SW800, this machine is built for continuous, every-day use.

This machine is most popular among farmers, contractors and for commercial use. Plus, by switching to the Rowtech applicator the machine becomes perfectly adapted to treat row crops.

SW900 Bare Unit
